

# Housekeeping on Deck (maritime) Meeting Kit

## WHAT'S AT STAKE

Housekeeping on the deck of a maritime vessel is vital for safety, emergency response, operational efficiency, regulatory compliance, and environmental protection. By maintaining a clean and organized deck, maritime operators can ensure a safe working environment, improve productivity, and reduce the risk of incidents that could have serious consequences for personnel, the vessel, and the surrounding ecosystem.

## WHAT'S THE DANGER

### PHYSICAL DANGERS AND HAZARDS OF INADEQUATE HOUSEKEEPING ON MARITIME DECK

- A cluttered or poorly maintained deck increases the risk of slips, trips, and falls for crew members. Debris, loose equipment, or spills can create slippery surfaces, uneven footing, or trip hazards. These accidents can result in injuries ranging from minor bruises to severe fractures or head injuries.
- If the deck is not kept clean and free from corrosive substances, equipment such as winches, cranes, or machinery can be affected. Accumulated dirt, salt, or chemicals can degrade the performance of equipment, leading to malfunctions or even complete failure. This can disrupt operations, cause delays, or compromise safety.
- Poor housekeeping practices can contribute to fire hazards on deck. In the event of a fire, the lack of proper housekeeping can impede access to firefighting equipment or obstruct evacuation routes, making it more difficult to control the situation.
- Neglecting proper waste management and disposal practices can result in environmental pollution. Garbage, oil, chemicals, or hazardous materials that are not properly contained or disposed of can be released into the marine environment, leading to contamination and harm to marine life and ecosystems.
- A cluttered or disorganized deck can obstruct clear lines of sight, impairing the crew's visibility and creating hazards during navigation. Obstructed pathways or unsecured equipment can lead to collisions or accidents on deck. It is crucial to maintain clear pathways, secure loose items, and ensure proper stowage of equipment to prevent such incidents.
- If accidents or environmental incidents occur due to negligence in housekeeping, it can tarnish the company's image and result in legal consequences, including fines or legal liabilities.

# HOW TO PROTECT YOURSELF

## HEALTH RISKS DUE TO INADEQUATE HOUSEKEEPING ON MARITIME DECK

Improper storage, handling, or disposal of chemicals, solvents, or cleaning agents can lead to crew members being exposed to hazardous substances. Inhalation, skin contact, or ingestion of these substances can result in respiratory issues, skin irritations, allergies, or other health problems.

Inadequate ventilation and accumulation of dust, fumes, or other airborne contaminants can lead to poor air quality on deck. This can cause respiratory discomfort, eye irritations, or aggravate existing respiratory conditions among the crew. Regular cleaning and proper ventilation systems help maintain a healthy and breathable environment.

Improper sanitation and hygiene practices can create an environment conducive to the spread of infectious diseases. Failure to properly dispose of waste or maintain cleanliness in common areas can lead to the proliferation of bacteria, viruses, or pests that can cause illnesses among the crew. Regular cleaning and adherence to proper sanitation protocols are essential to prevent the transmission of diseases.

Moisture and dampness on deck can contribute to the growth of mold and mildew, especially in areas such as cabins, storage spaces, or poorly ventilated compartments. Exposure to mold spores can trigger allergic reactions, respiratory issues, or exacerbate existing respiratory conditions. Proper moisture control and regular cleaning are crucial to prevent mold and mildew growth.

Disorganized or cluttered deck areas can lead to poor ergonomic conditions for the crew. Improperly stored or arranged equipment can result in awkward body positions, repetitive strain injuries, or musculoskeletal disorders.

## BEST PROTECTIVE MEASURES IN THE CONDUCT OF HOUSEKEEPING ON MARITIME DECK

1. **Wear Personal Protective Equipment (PPE):** Always wear the appropriate PPE as required for the task at hand. This may include safety goggles, gloves, protective clothing, hearing protection, or respiratory masks, depending on the nature of the work and the potential hazards involved. PPE helps protect against exposure to hazardous substances, physical injuries, and other risks.
2. **Follow Safety Procedures and Guidelines:** Familiarize yourself with the safety procedures and guidelines specific to your vessel and work environment. Pay attention to safety briefings and training sessions provided by your company or authorities. Follow established protocols for equipment operation, waste disposal, emergency response, and general safety practices.
3. **Maintain Good Hygiene Practices:** Practice good personal hygiene to prevent the spread of germs and minimize health risks. Wash your hands regularly with soap and water before eating or touching your face. Avoid touching your face, eyes, or mouth with dirty hands.
4. **Proper Handling and Storage of Hazardous Substances:** If your work involves handling hazardous substances, ensure you are trained in their proper handling, storage, and disposal. Use designated storage areas and labeling systems to ensure safe and organized handling of hazardous materials.
5. **Maintain Clean and Tidy Workspaces:** Regularly clean and organize your work areas and storage spaces. Clear any debris, spills, or obstructions promptly to minimize the risk of slips, trips, and falls. Keep walkways and pathways clear and well-lit to ensure safe movement around the deck. Properly stow equipment and tools when not in use.
6. **Proper Ventilation and Air Quality:** Ensure proper ventilation on deck to

maintain good air quality. Open windows, hatches, or utilize ventilation systems as needed. If working in enclosed spaces, use respiratory protection when required and ensure proper air exchange.

7. **Seek Medical Attention for Injuries or Illnesses:** If you sustain any injuries or develop symptoms of illness during your work, promptly seek medical attention. Report any accidents, incidents, or health concerns to the appropriate authorities.
8. **Stay Informed and Updated:** Stay informed about safety regulations, industry best practices, and any specific guidelines relevant to your work on deck. Stay updated on training requirements and participate in ongoing safety programs and drills to enhance your knowledge and preparedness.

## FINAL WORD

Housekeeping on deck in maritime operations requires the implementation of various safety precautions to protect the crew and minimize the risk of accidents. By conducting thorough safety briefings, providing and enforcing the use of personal protective equipment (PPE), and identifying and mitigating hazards, the overall safety of the work environment can be enhanced.
